

The Board of Pharmacy has received notice of the following product recall. The Board strongly encourages pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action is required.

Akorn Operating Company LLC (“Akorn”), which manufactured Levsin® Injection 0.5 mg/mL for Meda Pharmaceuticals Inc., has filed Chapter 7 bankruptcy. In connection with that filing, the company has ceased and shutdown all operations, including its Quality program, and terminated all its employees at all domestic US sites. The discontinuation of the Quality program means Akorn will not be able to support or assure that the products it manufactured will meet all intended specifications through the labeled shelf life of the product. As a result, Meda is conducting a voluntary recall of Levsin® Injection 0.5 mg/mL, manufactured by Akorn, which is still within expiry. To date, no reports of adverse events associated with this lot have been received.

Product: Levsin® (hyoscyamine sulfate injection, USP) 0.5 mg/mL Injection, 1 mL Ampule

NDC Number: 0037-9001-05

Lot Number: 101241A
