

The Board of Pharmacy has received notice of the following product recall. The Board strongly encourages pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action is required.

Golden State Medical Supply Incorporated (GSMS Inc.) is implementing a product recall for Rifampin Capsules involving the lots identified below. The lot numbers subject to this recall were first shipped on March 05, 2021. This recall is being carried out to the *retail level*.

Reason for recall:

GSMS received a recall notification from Akorn prompted by four (4) lots of Rifampin finished product exceeding the 5-ppm interim limit for 1-methyl-4-nitrosopiperazine (MNP) as per FDA’s Discretionary Release Criteria. The affected lots were repacked under the GSMS NDC.

As a type of nitrosamine, MNP is a possible human carcinogen (a substance that could cause cancer). They may increase the risk of cancer if persons are exposed to them above acceptable levels and over long periods of time. Most nitrosamines exposure in humans comes from dietary sources such as drinking water, food and beverages such as meat, fish, vegetables, tobacco, and personal care products.
