

*The Board of Pharmacy has received notice of the following product recall. The Board strongly encourages pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action is required.*

VistaPharm Inc. is announcing a recall of one lot of Pyridostigmine Bromide Oral Solution, USP (see table below for lot details) to the retail level.

VistaPharm is conducting this recall due to the low assay value of one of the preservative ingredients in the product lot that does not meet the approved specification level. This is a secondary preservative in the lot, and the primary preservative remains at specification. All other values for this product continue to meet specification, and this lower value with the preservative would not be expected to negatively impact product effectiveness. However, since this lot is not meeting the filed and approved specification, VistaPharm has initiated this recall.

The product is packaged in the following configurations: NDC# 66689-406-10 supplied in a case containing 10 unit dose cups of 5 mL, packaged in 1 tray of 10 unit dose cups eac.
